# EBCOG Diploma in Maternal Medicine & General Obstetrics

## Empowering Excellence in Prenatal Care

### Program Overview

The EBCOG Maternal Medicine and General Obstetrics Diploma provides rigorous and comprehensive training in maternal medicine, addressing the full spectrum of normal and complicated pregnancies. This program is structured to empower healthcare professionals with advanced skills and knowledge to manage and improve outcomes in both labor and delivery and maternal medical disorders.

### Curriculum Highlights

#### Labor and Delivery

- Advanced Delivery Techniques:** Including induction and augmentation of labor, nonstress testing, and epidural analgesia
- Innovative Tools:** Training on the Odon device, a new tool in obstetrics for safer delivery
- Special Conditions:** Management strategies for preterm labor, VBAC (vaginal birth after cesarean), and multiple pregnancies
- Surgical Skills:** Techniques in LSCS (lower segment cesarean section) and operative vaginal delivery using vacuum and forceps

#### Medical Disorders in Pregnancy

- Comprehensive Patient Care:** From hyperglycemia, anemia, and hypertension to more complex conditions like heart disease, thyroid disorders, and autoimmune disorders in pregnancy
- Infectious Diseases:** Protocols for managing HIV in pregnancy
- Neurological and Respiratory Considerations:** Tailored approaches for managing neurological symptoms and respiratory disorders during pregnancy
- Postpartum Management:** Strategies for dealing with postpartum issues such as puerperal pyrexia and contraception in high-risk patients

#### Special / High-Risk Conditions in Pregnancy

- Fetal Care:** Addressing fetal growth retardation and conditions like Rhesus isoimmunization
- Pregnancy Complications:** Management of oligohydramnios, polyhydramnios, and complications from ART

- Nutritional and Metabolic Health:** Tackling obesity and metabolic disorders during pregnancy
- Preventive Health:** Guidelines on vaccines and handling of carcinoma cervix in pregnancy

#### Critical Care in Obstetrics

- Emergency Management:** Handling of postpartum hemorrhage, placenta previa, and placenta abruption
- Severe Complications:** Strategies for dealing with uterine rupture, severe infections, and critical care in the obstetric high dependency unit (HDU)

#### Workstations / Hands-on Training

- Practical Skills Development:** Hands-on training in using outlet forceps, vacuum cups, Odon devices, MVA syringes, IUUD, and compression sutures
- Real-world Application:** Each session is designed to enhance both the technical and decision-making skills necessary for modern obstetric practice

#### Why Train with us

- Expert-led Instruction:** Learn from a faculty of renowned specialists and leaders in maternal-fetal medicine
- Multidisciplinary Approach:** Gain a holistic understanding and practical skills through a curriculum that covers the latest in both theory and practice
- Career Advancement:** Elevate your professional qualifications and readiness to handle complex cases in maternal medicine
